• 10% - SBG Free Response Questions by Chapter

This year one of the grading categories will be determined by standards based grading (SBG). SBG tracks a student's performance on a learning outcome throughout the course. For Honors Geometry, SBG will be used to assess proofs. Each question will receive a score of a 4-1 which aligns with a scoring rubric. Students can demonstrate a

- 4: Exceeds Expectations
- 3: Meets Expectations
- 2: Approaching Expectations
- 1: Does Not Meet Expectations

Each proof grade will be published to PowerSchool so students, parents/guardians and guidance can see the student's progress. Individual proof grades will not be counted into the final grade. Your teacher will enter a grade under the category Proofs that corresponds to your mastery of the learning outcome. This grade will be updated at mid semester and the end of the semester. The percentage will be entered as follows:

4.0 → 100%	3.9 - 3.7 → 97%	$3.6 - 3.4 \rightarrow 93\%$	3.3 - 3.1 → 89%
3.0 → 85%	2.9 - 2.7 → 82%	2.6 - 2.4 → 79%	2.3 - 2.1 → 75%
2.0 → 70%	$1.9 - 1.5 \rightarrow 65\%$	$1.4 - 1.1 \rightarrow 60\%$	1.0 → 55%

Canvas will keep track of your mastery of the learning outcome. If you Meet or Exceed Expectations on at least four of your proofs, the scores that are Approaching or Do Not Meet Expectations will be dropped and the proofs that scored a 3 or 4 will be averaged. If you Meet or Exceed expectations on less than four proofs, all scores will be averaged. **four proofs is just an example. Once we get into the semester a bit more an exact number will be calculated.

Example: Proof Scores - 3, 2, 4, 1, 4, $3 \rightarrow 3.5$

Example: Proof Scores - 3, 2, 4, 2, 1, $3 \rightarrow 2.5$
