

**ACP Algebra 2 - Ms. Pieri**  
**Classroom Expectations and Grading Policy**

**Classroom Policies and Expectations**

**Be prepared and productive:**

Students are expected to arrive to class each day prepared to **participate**.

This means you should:

- complete all activities assigned during class. If you are unable to complete all assignment(s) during class it is expected that you will complete the assignment(s) outside of class.
- work cooperatively with others on in-class group assignments.
- take detailed notes on material presented in class.
- come to class with the necessary materials: assignments completed outside of class, pen/pencil, paper and calculator.

**Be Prompt:**

Try your best to make it to each class on time, we will begin class when the bell rings. I will be taking note of tardies and if they become a consistent habit. If you are with a teacher you can ask them to write you a pass to excuse you.

**Absences:**

If you miss a class please check in with me or check Canvas to see what you have missed. If you miss any sort of assignment you will be expected to complete that on your own outside of class time. I am happy to meet with you to discuss the material or activities you need or you can review the class notes on your own and ask me follow up questions if you prefer.

**Grading Policy**

**Assessments**

- During each term there will be roughly 3 assessments
- These will be either a test or a project relating to what we are learning at the moment
- Each assessment will be worth 15% of your term grade

**Quizzes and Collected Classwork**

- As we work through our units I will collect classwork for a grade or we will have a short quiz relating to the topic we have covered
- These quizzes and classworks will be relate closely to questions done on Delta Math

**Cumulative Assessment**

- At the end of each term there will be a cumulative assessment that covers everything we have learned in the quarter

**ACP Algebra 2 - Ms. Pieri**  
**Classroom Expectations and Grading Policy**

- This will be worth 30% of your term grade (the equivalent of two test grades)
- There will not be a final exam for this course but there will be a cumulative at the end of term 4

**Flex Grade**

- At the end of each term I will enter a flex grade. This will be either the grade you received on your cumulative assessment or the average of your term assessments, whichever is higher

**Homework**

- I will assign homework on Delta Math, however these assignments will not be graded
- It is in your best interest to do the assignments so that you can ask questions and see how you are doing with the unit
- When we have a quiz or collected classwork assignment they will often relate to the questions that were on Delta Math for homework you it is good to make sure you understand the types of questions that were assigned

**Grading Rubric**

- |                                   |     |
|-----------------------------------|-----|
| - Term Assessments                | 45% |
| - Cumulative Assessment           | 30% |
| - Quizzes and Collected Classwork | 15% |
| - Flex Grade                      | 10% |

**Units Covered:**

- Algebra 1 Review
- Linear Functions
- Absolute Value Functions
- Linear Systems of Equations
- Quadratic Functions
- Properties of Integer Exponents
- Polynomial Functions
- Rational Exponents
- Right Triangle Trigonometry
- Statistics
- Logarithmic Functions
