# Editing Selections

1 Modify

Allows you to slightly change the place or quality of a selection or mask.

BUT THERE'S A PROBLEM...

You have to make sure you have the layer or mask selected!

Managing Layers

2 Groups

Hold shift to select layers and press Command G -or-

click the folder icon at the bottom and drag layers to the new folder.

BUT THERE'S A PROBLEM...

You have to make sure your layers are still in the correct order
